

SERVICE YOU CAN RELY ON

Qualified service anytime, anywhere

It's an important RAM commitment that's also vitally important to our customers. It also reaffirms our belief in our products and reinforces our pledge to provide continuing customer support.

RAM will be there for start-up, general maintenance, installation, quality check and troubleshooting. Our trained technicians are there whenever they are needed, wherever they are needed, staying as long as it takes to get the job done.

That's how dedicated RAM is to reducing your downtime and maintaining your maximum production efficiency. And down the line, we will continue to provide the support you need when the die set needs to be rebuilt or reconditioned.

RAM never calls it quits after the buy-off. As long as you have our die sets in production, you will have RAM behind you.

RAM'S manufacturing floor is where blueprints and designs come to life

RAM's commitment to precision workmanship creates a positive advantage for you, starting with our work on our manufacturing floor. Our qualified engineers, technicians and assembly teams meticulously design and assemble die sets to match customer specifications and operating requirements. Our modern facility is also where we house testing, quality control, die assembly and spare parts.

Quality service. Quality products. That's the RAM story.

OVER A HALF CENTURY OF EXPERIENCE

RAM Innovative Technologies has been a forerunner in close-tolerance precision specialty machining and design for over a half-century. Our international reputation for quality in the global container industry is rooted in a unique blend of experience and know-how, integrating state-of-the-art technologies, cost-effective production and a concentration on customer satisfaction that consistently results in repeat business.

Our partnership with Quality Machine and Repair has created a collaboration that provides our customers with the benefits of each company's expertise and specialized resources. The result is advanced precision technologies and innovative engineering designs — the perfect marriage of detailed tooling with cutting-edge 2-piece container technology.

Experience from the past, a commitment to the present, and our vision for the future combine to make us the best choice for all your two-piece metal forming requirements.
